OUR MISSION

WELCOME TO FRENCHIE NETWORK

Deployed on Binance Smart Chain, we aim to cement the Frenchie Network ecosystem as the first and foremost project to bring-in a revolutionary real public smart chain that is faster, more eco-friendly and cheaper than any of the other competition out there.

Our primary goal is to make Frenchie Network a high-performance, scalable, and secure smart-contract platform. Designed to overcome the limitations of previous generation blockchain platforms. A blockchain network that can compete head-to-head with DOGE blockchain, yet smarter and faster with an extremely low inflation that can sustain a real-world economy.

Frenchie Network will be permission-less, decentralized, and open-source.

Consensus mechanism used by Frenchie Network, aBFT its revolutionary between smart-contract platforms similar to Binance Smart Chain, Ethereum and others alike, it allows Frenchie Network to be much faster and cheaper than older technologies, yet extremely secure.

Our secondary goal, but also a priority is to create a friendly community on which we could make a real change in the world, by creating a “#FrenchieSavesTheWorld” fund in the near future, to support our community members in need and by helping other communities that have been scammed in their investments. Our community will participate actively to support fragile environment the world currently faces. Since #COVID19 many people are without jobs and some out on the streets. We will do “live events” in which we will buy groceries and supplies across the world for families and children in need, for orphanages, and street-people.

We believe this goal can be achieved with a strong community. With a strong community that has the traits of our beloved French Bulldogs, it will be possible for us to succeed in such competitive crypto environment.

VISION & TOKENOMICS

ABOUT THE PROBLEM

There are numerous roadblocks that prevent people and organizations from enacting meaningful changes to people lives, and also in respect to our current financial systems that reward the rich, and punishes the poor.

In cryptocurrency we can take care of both. That's why we did not start with a pre-sale, and it is also the reason why the majority of the Marketing Funds will go to Airdrops, Giveaways , Contests, Liquidity and Bootstrapping Pools. It will give us enough room and liquidity to redistribute the token fairly, even too those who cannot afford to BUY it.

With these concepts in mind, Frenchie Foundation has been created with a progressive burn mechanism to form a bond between our product and our goals. This ensures that investors are not hampered by inflation or by changing market conditions. But in the same time are in-sync with all holders.

The burn mechanism is as follows. We will burn 25 BILLION FREN each time we reach 250 holders up to 2500 holders. This will create a deflation that will be directly linked with the number of FREN owners, and keeping our vision to empower all people from the poor ones to the richer ones. Making it fair for all investors, no matter the amount of FREN they have.

After the first 60 days, we will assess the FREN mechanics and determine if further burn is required. If its required we will take 3% + 2% out of Development & Marketing Funds in order to rebalance. .

These principles accomplish a number of key goals:

- Reduces day-to-day volatility of the FREN Token value
- Creates financial conditions for exponential growth over time
- Constant and organic growth based on actual FREN believers & investors.

Tokenomics Breakdown

Initial Supply 1,000,000,000,000	Initial Liquidity 250,000,000,000	Marketing 300,000,000,000	Development 200,000,000,000
---	--	--	--

Initial Liquidity Lock
12 Months

Total Supply
750,000,000,000
Burned Supply
250,000,000,000

Vested Funds
347,700,000,000 between
5-10 months part of
Development & Marketing

WHY BLOCKCHAIN NETWORK ?

We've seen the value behind DOGE inflation, the accessibility and fun-to-use feeling of it. But we also saw the lack of adaptability to constant demand, and the need for a fun and easy to use cryptocurrency that still gives a good user experience.

FREN will be a true competitor for DOGE, a token that will go head-to-head for usability with a blockchain technology for payment systems to offer cheap and fast transactions across the world, and to have access to smart contracts and IoT access at extremely low cost.

This is similar to a network like DOGE, but also with the power of an infrastructure similar to Tron or BSC. On top of that, we will replace the old obsolete Proof-of-Work cryptography, and move into a Proof-of-Stake system for more ecological reasons due to zero carbon emissions and silicon usage.

IS THERE A PLAN B?

The 'Plan B' is to remain a community driven token, in which we can renounce ownership and let it live by itself similar to DOGE. It will be Open-source and free to act-upon it by nodes / self-governance.

Alternatively we will deploy FrenchieDAO, a self-governance contract in a swap upgrade and let the community control its funds, burn rate and vault wallets for development and marketing.

Either solution offers a much more flexible, self-governed token.

MARKETING PLANS

Marketing is already underway with PR Companies that we already closed and paid for a great package for the Frenchie community that includes articles for Marketwatch, Hackernoon, Cryptopotato and NewsBTC.

We've reached out to Youtubers and Crypto Twitter influencers, organized our first 'twitter meme contest' and we are preparing tik-tok challenges, guerilla airdrops, and even a surprise airdrop for those poor people that were scammed in a so called 'rug pull' movement.

We are gradually being added to some centralised exchanges to compliment our existing presence on 1inch and Pancacke Swap. We can now boast listings on XT.com , Bibox, BiOne and soon Hotbit and Coinsbit.have been.

USE CASE SUMMARY

We're an community-based token on the Binance Smart Chain that rewards its holders and users by being transparent team with vested and locked funds, by burning 25% of its supply and even more if necessary after 60 days since token launch, distributing over 30% of its supply to talented developers, artists, other communities and create an even and fair financial environment.

FURTHER PRODUCTS AND TECHNOLOGY USE

Between our merch, airdrops, burn events, giveaways, and the FrenDAO, we are hoping to bring a thriving, fun, and rewarding ecosystem to the Binance Smart Chain and to the world. However, Frenchie Developers is not something that stops at these core visions. We will continue to innovate and find ways to use our financial and technological capabilities to bring further innovation in the cryptocurrency community!

FRENCHIE ECOSYSTEM

MORE THEN JUST A 'MEME'

Obviously, a token that serves no purpose but to raise funds will not sustain market value over time no matter how good the tokenomics. That is why Frenchie is hard at work to develop a comprehensive, forward-thinking roadmap for crypto use in Self-Governance, Eco-friendly blockchain technologies, and Financial Inequality.

This roadmap includes the following key components:

MERCHENDISE

Frenchie Network is working with AAA Graphic Designers, Game Artists, and 3D designers to bring amazing, cute, and fun merchandise to the market. This merchandise will formed out of Non-Fungible Tokens (NFT's) and physical items like stickers, t-shirts, hats, baseball caps and more!

With a network of fiat merchant official stores & NFT Markets what we aim to use the 50% OF THE FIRST YEAR PROFITS added as Liquidity togheter with required of % Marketing Funds in BUSD(stable coin) and burned forever. In case profits are bigger then all remaning % Marketing funds by the end of that will be used to buy FREN and BURN them.

FFRENCHIE NETWORK

The hallmark is to cement the Frenchie Network ecosystem as the first and most revolutionary project to bring-in a real public smart chain that is faster, eco-friendly and cheap then any other possible competition out there.

THE TEAM

SPIRY CAPITAL

The journey started at a young age, by seeking knowledge in cyber-security domain and became well-know withing the cyber-security niche at that time.

At the age of 15 years the founder was activating Romanian Security Team (R.S.T) as one of the 'Super-Moderator' giving him the responsibilities to mentor the new users that seeked guidance in learning and where eager to learn about cyber-security

In 2014-2015 he founded crypto news platform 247cryptonews.com and Spiry Capital (spiry.ro). 247CryptoNews being a project that has opened him to multiple new opportunities in cryptocurrency world. Learning the trades of Marketing & PR among peers, how project requests press-releases and the avarage request price for a press releases. Also the experience offered a lot of connection into the Crypto Public Relation world.

Spiry Capital as today remaning his 'brand' umbrella to which his investment and projects to be known In same moment he has been involved directly into the Development Teams of crypto projects & blockchain developments like Expanse, TeslaCoin, FrankoCoin, MagicInternetMoney and more. All part of his journey to better understand the underlying mechanics, technicalities, security and fundamentals of blockchain technology.

Now we are a big team formed out of 4 developers aiming to solve issues around the globe by the power of Decentralized Finance and pure code!
